In the heart of New York City, among the towering skyscrapers and bustling crowds, there stands a beacon of holiday cheer: the Rockefeller Center Christmas tree. This year, the iconic tree hails from Oregon's Douglas Fir Christmas Tree Farm, owned and operated by Kyndra Hatch. Kyndra is not only a Christmas tree farmer but also a conservationist and advocate for sustainable forestry practices.

The journey of the Rockefeller Center Christmas tree begins long before it arrives in Manhattan. Each year, a team of experts scours the country in search of the perfect tree. This year, they found their match in a 79-foot-tall Douglas fir from Kyndra's farm. The tree was harvested in November and transported across the country on a flatbed truck.

Kyndra's love for Christmas trees began at a young age. She grew up on her family's Christmas tree farm in Oregon, where she learned the importance of sustainable forestry. When she took over the farm from her parents, she made a commitment to continue their legacy of stewardship while also embracing innovative practices.

Kyndra's farm is a model of sustainable forestry. She uses sustainable harvesting techniques, plants native trees to support local wildlife, and protects sensitive ecosystems. She also works with local organizations to promote responsible tree care and disposal practices.

Kyndra's dedication to sustainability is evident in every aspect of her business. She uses renewable energy sources, recycles materials, and composts organic waste. She also educates her customers about the importance of responsible tree care and disposal.

Kyndra's passion for Christmas trees goes beyond her farm. She is also a member of the National Christmas Tree Association, where she advocates for sustainable forestry practices and promotes the importance of real Christmas trees.

Kyndra's commitment to sustainability has earned her recognition and awards from both the forestry industry and environmental organizations.

She has been featured in numerous publications and has spoken at conferences about the importance of responsible tree care and disposal.

Kyndra's story is an inspiring example of how one person can make a difference. Through her passion for Christmas trees and her commitment to sustainability, she is spreading joy and cheer while also protecting the environment.

As the Rockefeller Center Christmas tree stands tall in the heart of New York City, it serves as a reminder of the hard work and dedication of Kyndra Hatch and all those involved in the Christmas tree industry. It is a symbol of holiday cheer, sustainability, and the spirit of giving.
